

# V-Motech

**ENGINEERING AND POWERTRAIN TESTING**

**INNOVATIVE SOLUTIONS**  
SERVING THE AUTOMOTIVE INDUSTRY

## EXPERT IN TEST ENGINEERING

V-Motech is a company specializing in engineering and powertrain testing. Expert in mechanics, electronics and embedded systems, we offer unique and innovative solutions in terms of engine testing, powertrain and unreleased vehicles.

Founded in 2012, headquartered in Paris with branches in Shanghai and Aachen, the company offers unique measurement and analysis solutions for vehicle research and vehicle development in Europe and Asia

V-Motech designs and operates robust testing capabilities. These offer to automotive manufacturers and suppliers access to **reliable solutions and technical expertise with high added value.**

Bringing together several teams of engineers and experts, the firm innovates and concentrates its expertise in three main areas: Engineering, powertrain testing and consulting.

## INNOVATION AND EXCELLENCE

These values are the main foundations of V-Motech's approach. More than words, they represent a philosophy and values at the service of engineering and our customers.

Our skills and expertise allow us to bring a high added value to your projects and their development.

### PERFECT MASTERY OF OUR SKILLS

#### INNOVATION AND PRODUCTS DEVELOPMENT

A design office composed of expert engineers develops the test solutions offered by V-Motech.

Thereby the company establishes itself as a truly innovative partner responding to market issues ahead.

#### TEST ENGINEERING

V-Motech has a real cluster of technical skills and expertise taking over the complete review and management of all kinds of vehicle and powertrain test campaigns.

#### EXPERTISE IN YOUR PROJECTS

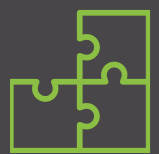

Mechanical, electrical, electronic, embedded systems and qualified engine expertise are as many skills that we propose to carry out your research and consultancy projects. In this way you can integrate and validate all of your development process.

## V-MOTECH'S FOUNDATION

### MOBILITY

Today, V-Motech is the only company that offers mobile test facilities to conduct testing campaigns at any time and in any location.

### MODULARITY

To respond in an appropriate way to the issues of the automotive market, the testing capabilities developed by our company can be combined to operate in a modular way.

### MUTUALISATION

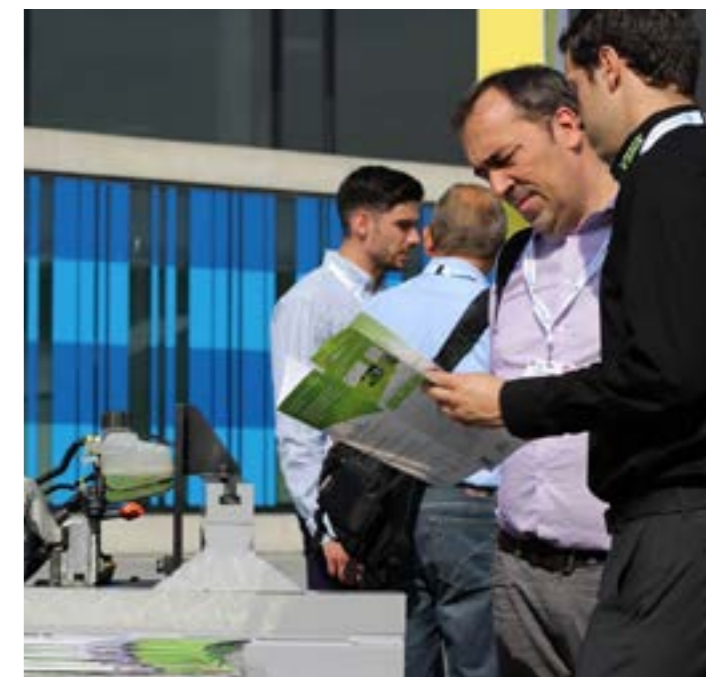

Depending on the workload, a split by time of use is proposed in order to guarantee all the advantages of full possession. Mutualisation allows high productivity for less constraint in the development of R&D. You can then precisely control your projects

## TURN-KEY SOLUTIONS

Thanks to a global view of the market evolution, V-Motech has developed a solid business model turned towards the future. It allows the company to work daily for the largest players in the automotive industry

To offer solutions that are always relevant and adapted to specific business requirements, we continuously develop turnkey innovations, to enable our customers to anticipate future market issues.

**These solutions are developed under ISO 9001 certification** in order to guarantee you high quality processes and services.

4 SOLUTIONS TO MEET 90% OF THE TEST DEMAND ON THERMIC, HYBRID AND ELECTRIC VEHICLES
